

Anaphylaxis and Allergies Procedure

Date policy created: September 2023

Policy version: 1.1 Updated: May 2024

Review date: May 2027

Policy contributors: H Downes and T Dearden

Rationale

Modbury High School aims to uphold the highest standards for our staff and students. This procedure is for all staff working in education and care to support children and young people with allergies and anaphylaxis.

This procedure must be read along with the departments [health support planning process](#).

Procedure

This procedure applies to educators, early childhood development specialists, principals, directors, and education support staff working in education and care.

It describes:

- proactive and reactive strategies for children and young people with allergies and anaphylaxis
- signs and symptoms of mild to moderate allergic reactions and anaphylaxis
- the emergency response for anaphylaxis
- the requirement for general use adrenaline (epinephrine) autoinjectors
- education and training for anaphylaxis
- risk minimisation strategies for children and young people with allergies to prevent anaphylaxis.

This procedure applies from the time a child or young person is enrolled until they leave the education and care service.

The procedure can be found here: [Anaphylaxis and allergies procedure \(edi.sa.edu.au\)](#)

Communication and review

Outline:

- Consultation has occurred via Modbury High School Executive Team and the school Governing Council Uniform and Policies Committee.
- The policy can be found in the school "MHS Staff" Team as it is an internal procedure.
- The policy will be reviewed at least every three years, or earlier if required, the next review date is May 2027.
